

File-based Workflows in Television

TERENA - 5th TF-Media Task Force meeting & Workshop
Pedro Ferreira – pedro.ferreira@mog-solutions.com

In the beginning... everything was simple

Still, push only...

Multiple contribution sources

Many distribution channels

Mobile

Web

VOD

Pull!

How did TV evolve to cope with this?

How *is* TV evolving to cope with this?

Which formats?

Which workflows?

Which system designs?

The Evolution of File-based production

Some time ago, television production
moved towards digital.

But handling uncompressed material was
complex.

Broadcasting products started using compression technology.

IT equipment performance increased and prices dropped.

IT technology started to invade the professional market.

It became clear that file-based
production was the future.

But several incompatible file formats
were in use.

WANTED

STANDARDS

1996

EBU/SMPTE Task Force
for Harmonized Standards
for the Exchange of Programme Material as
Bitstreams

Essence

Not a single compression technology will prevail

Systems must handle various formats

Metadata

A new class of program-related data

Should be easily translated between systems

Should be available electronically and linked to
the essence

Content = Essence + Metadata

Need to proceed work on standards,
namely on Essence and Metadata

Wrappers

Replace sneakerbots and tape

With networks and files

...but, and
of

Material eXchange Format

a standard file format
for the interchange of
Essence and Metadata

Defined in SMPTE S377M

Expandable

Coding format independent

Agnostic to metadata scheme

Provides technical descriptions

Efficient

Useful for ingested or finished material

Introduction of a new Technology

Euphoria

Disillusionment

Real product and real work

Rockley Miller – Multimedia Monitor

Euphoria

Disillusionment

Real Work

→ *“Once I have a file with a ‘.mxf’ extension, I will be able to use it anywhere...”*

→ *“It doesn’t work since each product has its own MXF...”*

→ **Real products in the market today
interchanging with MXF**

Slow initial adoption, but backed by
strong vendors

Rise in adoption around 2007

Currently MXF is pervasive in
production, post, archive, play-out

And in other industries...

STATE-OF-THE-ART: CAPTURE AND POST FORMATS

Professional Wrappers

Legacy: GXF, LXF, AVI

Professional video formats

MPEG-2 I-Frame, Long GOP

DV variants

JPEG2000

AVC-Intra, AVC Long GOP

ProRes and DNxHD

JPEG2000

Professional audio formats

PCM

Multi-resolution Workflows

Hi-res

Proxies

Search, off-line editing, preview/dailies

Typical Workflow: News Production

Prepare story:

Line	Shot	Media	Camera	Focus	Sound	Light	Time	Start	End	Time
A1	HEADLINE 1	VO				A		00:00:30	00:00:02	7:09:25 PM
A2	HEADLINE 2	VO		WIPE		B		00:00:30	00:00:00	7:09:55
A3	HEADLINE 3	VO				C		00:00:30	00:00:00	7:09:55 PM
A4	HEADLINE 4	VO		WIPE		D		00:00:30	00:00:00	7:09:55 PM
A5	SHOW OPEN	SHOT		TOP		F	SHOW OPEN	00:00:15	00:00:00	7:09:55 PM
A6	SHOW INTRODUCTION	INT						00:00:10	00:00:04	7:10:10 PM
A7	NEWS HOLE							00:00:00	00:00:00	7:10:20 PM
A8	BUMP 1.1	VO	TWO SHOT			A		00:00:30	00:00:01	7:10:20 PM
A9	BUMP 1.2	VO	TWO SHOT	WIPE		B		00:00:30	00:00:00	7:10:50 PM
A10	BUMP 1.3	LIVE	WEATHER GUY			WEATHER CENTER		00:00:30	00:00:00	7:10:50 PM
B1	NEWS HOLE							00:00:30	00:00:00	7:11:20 PM
B2	BUMP 2.1	VO	TWO SHOT			C		00:00:10	00:00:01	7:11:20 PM
C1	WEATHER	INTRO	THREE SHOT					00:00:10	00:00:00	7:16:00 PM
C2	WEATHER	WX	WEATHER GUY	WX WALL		WX WALL		00:00:00	00:00:00	7:16:10 PM

Playout

**FROM ONE TO MANY,
TO ANY TO ANY**
